Sir:

**ELECTION**

The applicant hereby makes the following election of species and claims. Regarding the restriction requirement the applicant elects the second group II for prosecution, identified in the Office Letter as claims directed to a stabilizer pad, classified in class 248, subclass 677. This included originally submitted claims 10-20. In view of the election, the non-elected claims, namely claims 1-9 have been canceled from this application without prejudice or disclaimer. The applicant has also added new claims 21-29 that are also directed to the elected subject matter.

In addition to the above election, the applicant also elects the species of the invention in Fig. 54. This election should also include many other embodiments herein included in Figs. 48-72. It is also believed that all claims, as now amended and added, are directed to at least that elected species. The applicant now presents amended and new claims for consideration by the Examiner.
